

Behavior Based Safety

Changing Culture
Not making Rules

What is Behavior Based Safety

- Human behavior causes most accidents
 - Comfort
 - Saving Time
 - Convenience
 - Lack of understanding and training
 - Complacency
 - Wrong Safety focus
 - Celebrating production over safety

Taking down Barriers

- Must be able to identify them first
 - Tools
 - Procedures
 - Habit
 - Time
 - Understanding consequences
 - Communication
 - Personal Issues

Observations

- You don't need to be an “expert”
- If it doesn't look right ask
- Use a simple template to do observations
 - Do a mock observation
- Questions and comments

Safety Tools

- Safety Manual
 - Procedures
 - MSDS's
 - PPE
 - Observations
 - Audits
